

INNOVATIVE COATING SOLUTIONS, INC.

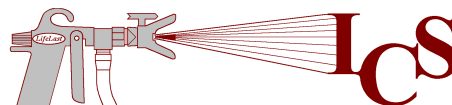

Industrial Tank Linings

*"We make your equipment
work better and last
longer".*

Industrial tanks are among the most severe environmental contaminants containers we work with. We have lining systems to deal with almost any thing you might contain in your tanks. Give us a call to see about specific applications and let us see if we can take care of your particular headache!

We specialize in onsite or portable blasting and spray-in polyurethane linings. We can work day or night, week day or weekend. Shutdowns are no problem. Tanks, containment areas, pipe, chemical resistant linings, thermal linings, burn safety coating, protection against condensation, and wear protection are just a few of our uses and applications. What are you waiting for, your equipment cost you a bundle, let ICS protect it!
